

Radically Reshaping Cancer Care  
from Early Diagnosis to Treatment

Are you ready to join the fight against cancer and improve the lives of millions of patients?  
Do you want to work with machine learning technologies that will redefine medicine?  
Join the Optellum team and help us shape the cancer care of tomorrow!

## Software Product / QA Analyst / Tester

### Your Mission: Would you like to

- Help bring to market AI solutions that will be deployed to improve cancer care in thousands of hospitals?
- Define and analyze pioneering medical software and have massive impact from Day One?
- Test AI solutions to ensure that our products benefit as many as possible without any risk of harm?

### Required Skills: You must have

- Strong analytical skills and attention to detail.
- Strong communication skills and ability to write clear documentation (specifications and test cases).
- Ability to break problems down and test their components.
- Prior industry experience in a regulated environment: medical technologies, aerospace, financials.
- The flexibility to feel at home in a start-up, as one of our first employees working closely with the founders.

### Desirable Skills: One or more of these would be a definite plus

- Experience from a startup or a fast-growing company a plus. Passion for biomedical topics a big plus.
- Hands-on software development background, ideally track record in analysis and testing
- Medical device development experience (ISO 13485).
- Strong degree in a scientific or a technical discipline.

### What We Offer

- Fast growth as one of first employees: full responsibility and freedom in determining your direction.
- Opportunity to apply in practice and grow your knowledge of machine learning and medical technologies.
- Competitive salary and benefits which will grow with the company, including significant equity.
- Flexible working hours from the outset. Working location may be negotiable in the future.
- Work permit sponsorship to the most exceptional candidates
- Beautiful office in Oxford's historical center and great quality of life (but only 1h by train to central London).

### Our Vision: Radically Reshape Cancer Care, from Early Diagnosis to Treatment

Optellum's goal is to ensure that every patient is directed into the optimal diagnostic and therapeutic pathway. We achieve that by providing every clinician with decision support for personalized early diagnosis and treatment, based on collective experience of thousands of doctors, pooled by Machine Learning from vast patient datasets.

We are a team of world-leading AI, imaging and clinical experts who met at Oxford's world-renowned computer vision laboratory, and we have track records of bringing innovation to market. Learn more at <http://www.optellum.com/>.
