

Redefining Early Cancer Interception

Are you ready to join the fight against cancer and improve the lives of millions of patients?
Do you want to work with machine learning technologies that will redefine medicine?
Join the Optellum team and help us shape the cancer care of tomorrow!

QA Engineer (Medical Software, AI)

Your Mission: Would you like to

- Help bring to market AI solutions that will be deployed to improve cancer care in thousands of hospitals?
- Define tests of AI solutions to ensure they benefit as many as possible without any risk of harm?
- Design automated testing and deployment processes, to bring agility into medical device development?

Required Skills: You must have

- Strong analytical skills and attention to detail. Ability to break problems down and test their components.
- Strong communication skills and ability to write clear documents (requirements and test specifications).
- Regulated software experience: medical technologies, automotive, aerospace, financials or similar.
- Experience with development under ISO 13485, or similar Quality Management System in another domain.
- The flexibility to feel at home in a start-up, as one of our first employees working closely with the founders.

Desirable Skills: One or more of these would be a definite plus

- Experience from a startup or a fast-growing company. Passion for medical topics a big plus.
- Track record in software verification & validation. Agile software development experience a big plus.
- Hands-on software development experience. Automated testing experience a big plus.
- Experience with medical device regulatory and quality compliance (FDA, CE marking).
- Strong degree in a scientific, technical or a medical discipline.

What We Offer

- Fast growth, ownership & high impact as one of first employees
- Professional development budget: grow your knowledge of AI/ML and other new technologies.
- Competitive salary and benefits, including significant equity.
- Flexible working hours from the outset. Working location may be negotiable in the future.
- Work permit sponsorship to the most exceptional candidates
- Beautiful office in Oxford's historical center and great quality of life (but only 1h by train to central London).

Our Vision: Redefine Early Cancer Interception

Optellum's vision is to redefine cancer care, by enabling every clinician, in every hospital, to manage their patients in the optimal way. We do that by providing end-end IT platform for personalized early diagnosis and therapy, based on the collective experience of thousands of doctors pooled by machine learning applied to vast patient datasets.

We are a team of world-leading medical imaging software, AI, and clinical experts who met at Oxford's world-renowned computer vision laboratory. Between us, we have track records of bringing innovation to market through over 10 start-up companies, resulting already in 5 trade-sales and one IPO. Learn more at <http://www.optellum.com/>.
